

RotoSpa

www.rotospa.co.uk

**UK'S ONLY SPA
MANUFACTURER**

Our story...

RotoSpa is a family business that started in 2003 when a friend was looking for a hydrotherapy hot tub following a hip replacement. After searching the market and not finding any British made spas suitable for recuperation, we decided to develop and build our own!

From those humble beginnings and word of mouth recommendation, RotoSpa has made a huge splash in thousands of homes across the UK.

And it's not just our customers who recognise a great product when they see one; our hydrotherapy spas have won awards and accolades from across the industry.

Our family firm may have got a little bigger, but every RotoSpa is still made right here in the UK. We take the same care and focus on our customers' specific needs as we did on the first spa we produced almost two decades ago.

**BUY SMART

BUY ROTOSPA**

Why RotoSpa?

Passionate about what we do, we're a family firm with nearly 20 years experience building multi-award winning spa pools that are durable, reliable and affordable.

We are the UK's only manufacturer of spa pools and are proud to be known as the nation's favourite home brand. Step into a RotoSpa and you'll understand why!

Our range of Holiday Park Spas were developed as a result of us identifying that there were distributors selling domestic spas into commercial environments such as holiday parks. We soon realised that the domestic spa was not fit for purpose. We identified that as a UK manufacturer there was an opportunity for us to develop the first holiday park spa that was truly fit for purpose and fully compliant to HSG282

We developed relationships with holiday park owners to understand their needs. We then spent time with the maintenance teams to understand the issues they faced with the day to day running and maintenance of the spas and what was needed to be improved. The result was a reliable, durable, energy efficient, low maintenance truly fit for purpose spa for your holiday business setting.

Our philosophy remains unchanged, and we are always working in partnership with our customers to ensure we are reactive to their needs and evolving our product range to be fully compliant with HSE and industry regulations. **Buy smart Buy British!**

GOLD AWARD WINNER
FOR HOT TUBS IN A HOLIDAY SETTING

KEY FACTS

Holiday makers expect spas and they are the number one requirement in online searches

RotoSpas increase income from accommodation by up to 50%

RotoSpas increase occupancy by up to 25%

RotoSpas drive out-of-season bookings

Why RotoSpa and holiday parks go hand in hand

- With nearly 20 years experience, we now supply hundreds of holiday parks across the UK, both large and small
- Dealing straight with the manufacturer means hassle-free, value-for-money
- Immediate product availability.

HEATING ROTOSPAS FASTER

Power Smart Heat Pumps slash running cost with 75% less energy consumption

How does it work?

Our heat pumps use refrigeration technology to extract heat from the air (even when cold) and only consume a very small amount of energy to power a fan motor and compressor. When compared to gas or electric heaters our heat pumps use a tiny portion of energy to generate the same amount of heat output, using around 75% less energy than an electric spa heater. If you run a busy site requiring fast spa turnaround times, an air source heat pump from RotoSpa guarantees fastest heat up times without extra electricity consumption.

What our clients say...

“ The heat pump units are small and attractive, they are also very quiet. We chose these units for two reasons, firstly the reduced running costs, however the best advantage for us was the fact that they require very little power to operate. This enabled us to run a glamping cabin for 4 people off a standard 16-amp supply. Power requirements will rise over time due to guests wishing to have hot tubs and as the need to charge an electric car grows, these units give us a way of coping with the increased power requirements. ”

Wallace Lane Farm

ECONOMICALLY AND ENVIRONMENTALLY FRIENDLY

- RotoSpas are 100% recyclable, the most recyclable spa available in the UK
- Keeping your running costs low – RotoSpa's unique RotoTherm insulation significantly reduces heat loss and energy consumption
- RotoSpa has the smallest environmental footprint of any Spa available in the UK
- RotoSpa UK are committed to buying locally, supporting our local economy and working towards being as environmentally aware as possible
- RotoSpas use green renewable energy solutions to cut energy consumption by up to 75%
- RotoSpas can run from as little as 4 amps!, utilising our Heat Exchange option
- RotoSpa is working towards Carbon Neutral Certification

EASY MAINTENANCE

- ✓ 8 minute complete rapid drain
- ✓ Fast fill time
- ✓ Heat time of 4 hours*
- ✓ 24 hour continuous filtration
- ✓ 8 cleaning cycles per day
- ✓ In-built ozone unit helps kill bacteria when filtering and decreases consumption of sanitisers used!

PowerSmart heat pumps

SPEEDY RETURN ON INVESTMENT

With any investment purchase you want to know that it will achieve an excellent return. Installing a heat pump to your spa offers such significant savings your payback period is extremely short. Unlike other renewables such as solar panels, which take up to 7-10 years just to reach the payback/break-even point, our SV Series heat pumps can return their cost in as little as 2 years. As a guide, to maintain your spa water at 37°C all year round, using a 5.5kW SV Series heat pump in comparison to a standard 2kW electric heating element you will save on average £700 per year (based on one drain and refill per week). So that is a speedy return on investment. The more you drain and refill the spa due to its increased use, the more heat loss must be replenished, which increases your savings and shortens your return on investment even further.

STANDARD ELECTRIC HEATER 3kW OPTION

Total heat up time per change-over	Weekly refill cost per annum	Maintain 37°C per annum	Total cost per annum
10 hours	£289.12	£421.48	£710.60

8.8kW HEAT PUMP OPTION

Total heat up time per change-over	Weekly refill cost per annum	Maintain 37°C per annum	Total cost per annum
3 hours 36 minutes	£56.16	£102.79	£116.10
Savings over electric 3kW heater per annum			£594.50

*PowerSmart air source heat pump

*Figures based on one drain and refill per week, 10°C fill temperature to 37°C set temperature, Unit cost 0.15p kWh. Heat up time and saving can vary upon ambient temperature.

FULLY HSG282 COMPLIANT

RotoSpa Holiday Park spas are fully HSG282 compliant. Our spas exceed the following requirement that your business needs to adhere to:

- Turnover rate – our high quality pump turns over water in just 8 minutes
- Continuous filtration – our spas have 24 hour continuous filtration
- The plumbing configuration of our spas ensures there are no dead-ends that can lead to bacteria growth
- Continuous sanitisation – our in-line tablet feeder ensures continuous sanitation of your spa
- 8 times a day automatic cleaning process.

Remote connectivity

The SmartLINK WiFi module and SpaLINK app allow you to connect to and take control of your spa remotely from any location at any time.

The SmartLINK module connects to any RotoSpa model and then uses your home WiFi network to facilitate communication between the app server and the spa.

Noisy guests? Need to silence the party?

The SpaLINK app becomes a mobile, wireless remote for your spa enabling complete control of all settings and accessories including pumps, blowers and LED lights from a safe location.

[Download the SpaLINK app from App Store or GooglePlay.](#)

In the know

Keep informed about the health of your spa with status updates direct to your phone.

Using the WiFi module and smart phone app, receive error alerts allowing you to react in real-time, ensuring the best possible spa experience. The app will clearly describe the issue and provide simple steps and solutions to resolve.

Speedy support

Seek remote technical assistance and resolve issues quickly through the SmartLINK [SpaLINK global](#) module, resulting in happy customers and no refunds! Should you need help, simply activate the support PIN within the SpaLINK app. This allows RotoSpa remote access to the spa to swiftly check software settings, control and test accessories and run diagnostic checks.

INSTALLATION OPTIONS

- Flexible installation to suit your needs - can be freestanding or lowered into your decking area
- RotoSpas are fully portable due to their unique design and can be moved easily by one person.

INNOVATIVE JET SYSTEMS

For maximum performance, RotoSpa uses high-flow multiple distribution systems on all models. Unlike a single pipe that's linked from jet to jet, our system delivers water individually to each jet for a uniform pressure.

Each seating placement enjoys multiple hydromassage effects from state-of-the-art therapeutic, adjustable and rotating massage jets strategically positioned around the spa. These include lower, middle and upper back combinations, with neck and shoulder, leg and foot massage systems.

A flow diverter and multi nozzle 'master massage' jet on the Quatro model gives a powerful back massage without the need for bigger pumps and extra power. In addition, the turbo air injection system adds millions of tiny air bubbles directly into the water behind your back, around your legs and under your feet for a wonderfully invigorating massage experience.

ENJOY CRYSTAL CLEAR WATER

The 'Ozone Sanitation Unit' is included as standard in all of our RotoSpa models. The ozone generator artificially generates a natural disinfectant gas that kills bacteria and acts as an oxidiser by removing bacterial debris left behind in the water. This clever little unit reduces the need for chemicals and is automatic, meaning less time preparing your spa and more time enjoying the beautifully clear water.

INTELLIGENT POWERSMART SPA CONTROL

- ✓ Lockable touchpad
- ✓ Incorporates dynamic thermal tuning, reducing overall running costs
- ✓ Smart filtration
- ✓ Auto daily sanitize
- ✓ Remote WiFi access
- ✓ Programmable sleep period
- ✓ Heat pump interface

Directional turbo hydro jet
This powerful jet introduces air straight into the water, for a superbly enriched full-body hydrotherapy massage.

2 SIZES: 3" & 4"

Multipoint air injector jet
This fixed air turbo jet opens up the airline and supplies the champagne effect in the water, with millions of blissful little bubbles surrounding your entire body. This jet creates a soft touch massage for calming muscle relaxation.

3 SIZES: 3", 4" & 5"

Adjustable rotational hydro pulse jet
This rotational pulse jet moves the water in a circular motion, enabling fantastic massage to a wider area.

Directional hydro pulse jet
This jet offers targeted therapeutic hydromassage to those particular pressure points that need extra attention.

15 point ultra-master massage jet
The holes in this jet insert deliver the ultimate in hydromassage performance. The ultra-master jet stimulates a wide area, particularly the many pressure points in the lower back, giving a sensational massage.

EscapeSpa

TECHNICAL SPECIFICATIONS

Size	1990mm x 1990mm x 770mm deep
Portable	Unique one-piece shell
Flexible installation options	Freestanding or built-into environment
Dry weight	172kg (1222kg filled)
Seating	5-6 Persons with master seat and 2 lounge seats
Water capacity	1050 Litres
Rapid drain	Drain down time 8 minutes (standard)
Electrical supply	240V 13 Amp - 25 Amp dependent on heater choice
Pump	1.5HP, Hi-Flow 2 speed pump (2 pumps in 1)
Filtration	Auto cleanse smart filtration
Heating options	- 2kW corrosion resistant element (standard) - 3kW corrosion resistant element - 1.6kW heat pump gives 8.8kW heating output (saves 70%-80% running costs) - Heat exchanger for connection to gas, oil and biomass boilers - giving the fastest heat-up time
Jets	25 x Luxury hydro jet package of directional, spinning, pulsing and direct jets with added diverter valve to direct water through all seating positions or through the 15 jet Ultra master massage jet in the captain's seat.
Insulation and durability	Lockable thermal hard cover, unique RotoTherm spa insulation throughout entire cabinet, spa base and rear of spa shell. Hard wearing tough spa shell with lifetime warranty.
Colour options	Granite grey or light grey with teak or dark grey wood effect panels
Draindown, clean, refill and heat-up time	From 30 minutes

Other features as standard

- Inline Disinfectant Tablet Feeder
- Ozone Sanitation
- 100% Circulation Plumbing: spa water is circulated through all pipes and jets all of the time, no booster pump circuits for water to sit in
- Silent Air Boost Control: increases hydrotherapy by injecting air into water stream
- Intelligent PowerSmart Spa Control System: incorporating dynamic thermal tuning, smart filtration, auto daily sanitise, remote WiFi access, programmable sleep period, heat pump interface
- Lockable Touchpad: user controls pump and light functions only
- Lighting: LED master light, illuminated touch pad & illuminated top side controls
- Remote support: WiFi enabled (optional)
- Insulated lockable thermal hard cover - keeps your heat in and everything else out

75 years
combined experience

“In year 3, the first year that we were able to advertise the addition of the RotoSpa, our bookings increased by almost 50% and year 4 by 80%.”

The Saddle House

“The addition of the RotoSpa is definitely having an impact on our enquiries and subsequent bookings. The spa is proving as stated easy to maintain, the lockable touchpad allows us to be in full control of the settings and limit our customers from altering settings.”

Oaks Barn Farm

“We had special requirements that we wanted fulfilling. We chose RotoSpa as they were able to provide the semi-commercial set up that we required, to include alternative heating options. RotoSpa fully designed and installed the set-up to meet the requirements of HSG282.”

Clippesby Hall

“We have fitted numerous RotoSpa units across our parks. We have seen a significant improvement in bookings and tariff for those units. The RotoSpa product is fantastic, it is easily fitted and cared for. A genuinely quality product that has helped hundreds of our guests have a fantastic time on holiday with us.”

Sand Le Mere Holiday Park

“We now operate 15 Rotospa units across our business chosen for the fact that they are manufactured in the UK and secondly that the construction of the spas allows the onsite team to quickly change any of the major component parts ensuring that the spas are always available to our lodge customers.”
