

## PICTURE COVERS

Customers wishing to optimise the utilisation of wall space in their properties, can site panels higher on the wall. Aesthetics may be improved by using our picture covers.

These have been designed to slide securely onto our heat panels using a special attachment.

The cover is also designed to allow the heat panel to perform without a significant reduction in energy performance.

Frame colour and the picture within the frame can be selected by the customer.

## RADIATOR COVERS

Customers wishing to achieve a more traditional look to the heating system can use our heat panel covers.

These have been designed to slide securely onto our heat panels using a special attachment.

The cover is also designed to allow the heat panel to perform without a significant reduction in energy performance.

The cover is supplied with a standard undercoat, ready for painting with normal home-decoration paints to the customers' specification.
